

Distinguished Zoologist Lectures

2019: **Richard Morris** (University of Edinburgh, UK) *The making and keeping of memory.*

2017: **Greg Gibson** (Center for Integrative Genomics, Georgia Institute of Technology, USA) *Humans as a model for the genetics of model organisms.*

2015: **Steve Jones** (University College London, UK) *Why so much genetic diversity - a scientist's view of snails in art and the art of snails.*

2013: **Judy Stamps** (University of California at Davis, US)

2011: **Barry Keverne** (University of Cambridge, UK) *Mammalian brain evolution.*

2009: **John Endler** (University of Exeter, UK) *Elaboration, innovation, speciation and visual signal design in Australian Bowerbirds.*

2007: **Geoff Parker** (University of Liverpool, UK) *Sperm competition, fertilisation conflicts and evolution.*

2005: **Ronald Plasterk** (Netherlands Institute for Developmental Biology, The Netherlands) *MicroRNAs in animal development.*

2003: **Sir Gabriel Horn** (University of Cambridge, UK) *Imprinting: zoology's gift to neuroscience.*

2001: **Sir John Krebs** (University of Oxford, UK) *From zoology to government policy.*
